🐙 [david-piatek](#) [in david-piatek-519aa275](#)

Father of two, living in the countryside, I have built a strong personal and professional balance that helps me handle pressure and the fast-paced nature of the tech industry with calm and clarity. Passionate about technology from an early age, I built my career around software development before moving into Tech Lead roles. This experience led me to work across application architecture, software quality and infrastructure, and gradually develop a strong interest in DevOps. Today, I work with a holistic product mindset, combining development, DevOps and automation, in a context where AI accelerates delivery cycles. I position myself as a product builder, at the intersection of development, DevOps and product.

## SKILLS

### Web Development

php symfony typescript  
golang bash

### CI/CD

gitlab github actions  
automation feature flags  
a/b testing

### Infrastructure & Provisioning

terraform ansible packer  
docker kubernetes

### Project Management

agile scrum mentoring  
management

### Testing

phpunit behat jest cypress  
tdd bdd

### Databases

mysql mariadb elasticsearch  
redis eventstoredb

### Cloud Providers

gcp azure digitalocean

### Miscellaneous

linux git

### Best Practices

solid kiss  
software craftsmanship

### Architecture

cqrs soa / microservices ddd  
clean architecture  
event sourcing

### Monitoring

new relic sentry elk  
dynatrace

## WORK EXPERIENCE (9)

**Senior PHP/Symfony Developer / DevOps (Freelance)** at Freelance missions **July 2025- Current**

Freelance missions focused on PHP/Symfony development, process automation and DevOps practices.

- PHP/Symfony development
- Process automation
- CI/CD improvements and Docker

**Senior PHP Developer / DevOps (Freelance)** at OneyTrust **June 2024- July 2025**

As a freelance engineer, I took ownership of a legacy system in order to modernize it and deploy it on Azure.

- Feature development
- TDD and hexagonal architecture
- CI/CD improvements
- Oracle to PostgreSQL migration
- On-premise to Azure AKS migration

**Tech Lead** at Skaleet **January 2023- November 2024**

<https://skaleet.com/en>

As a Tech Lead, I led my squad. Working closely with the Product Owner and Test Manager, I helped define specifications and ensured technical feasibility.

- Team leadership
- CI/CD improvements
- Specification writing
- Proofs of concept
- Architecture
- Level 3 support

**Lead Developer / DevOps** at Pharmanity **January 2021- June 2022**

<https://www.pharmanity.com/>

My initial mission was to maintain the existing platform while adding new features. I later recruited a new team and led a full redesign, including infrastructure and architecture.

- Rebuilding the stack after the OVH fire
- Disaster Recovery Plan implementation
- Mobile application factory setup
- CI/CD implementation
- New CQRS-based microservices architecture
- SCRUM team management

**Co-founder / Architect / DevOps** at Drawsheap **June 2019- March 2021**

Defined product direction and implemented architecture and DevOps practices for building an ERP/CRM dedicated to small businesses.

- Use case design
- Scalable and resilient architecture implementation
- Website factory setup
- CI/CD

- Kubernetes cluster management

**Senior PHP Developer** at PrestaShop   **January 2019- December 2020**

<https://www.prestashop.com/>

Worked on turning PrestaShop into a SaaS product by securing and optimizing features, migrating customers off the SaaS offering, and contributing to the new monetization system.

- Docker image deployment on Kubernetes
- Hosting-agnostic migration scripts
- Open-source contributions
- Development environment setup

**Lead Developer** at Foxnot   **November 2016- December 2018**

<https://www.foxnot.com/>

In an early-stage startup, I built the team and ensured knowledge transfer from external providers. We designed out-of-the-box solutions to enable communication between the website and notary software.

- CI/CD implementation
- Team management
- Hardware/software interfacing
- Best practices adoption
- Infrastructure management

**Full-stack Developer** at La Centrale Pharma   **June 2013- April 2016**

<https://www.lacentralepharma.com/>

As a full-stack developer, I worked with multiple PHP technologies (Joomla, Symfony) and built web services (REST and SOAP).

- PharmaML protocol implementation
- Statistical analysis tool development
- SOAP integration with e-learning platforms
- PHP backend maintenance

**Founder / Photographer** at David Piatek   **June 2011- August 2013**

Business management, photography, and photo development.

- Company management
- Vendor sourcing
- Photography

---

**VOLUNTEER**

**Head of Communication** at Prunaystival

October 2024 - Current

Organizing a local music festival for over 10 years to bring life to the village.

Active member at Les p'tites canailles

September 2022 - Current

Parents' association supporting the local village and primary school.

## EDUCATION (3)

Professional training Paris at SensioLabs

2014 - 2014

symfony

Professional Title – Application Developer Tours at Cefim

2014 - 2014

project management

application prototyping

java

android

mysql

Professional Title – Multimedia Designer Tours at Cefim

2012 - 2012

photoshop

illustrator

html/css

wordpress

## LANGUAGES

French

Native speaker

English

Intermediate

## INTERESTS

Art

juggling

music

photography

DIY

renovation

gardening

Misc

bmx

fishing

## REFERENCES

" I had the pleasure of managing David as a freelance developer and DevOps engineer and highly recommend him. David has an excellent command of DevOps practices and played a key role in improving our CI/CD pipelines and supporting our cloud and Kubernetes migration projects. Beyond his technical skills, David stands out for his calm demeanor, clear communication and ability to explain complex technical concepts. "

**Guillaume Beauventre – CTO – OneyTrust**

" David's expertise in software development is unquestionable, from PHP to software craftsmanship practices, combined with strong infrastructure knowledge (CI/CD, Docker, Kubernetes). He is a pleasant, committed professional who always finds solutions to problems. I truly enjoyed having him on my team. "

**Paul Jay – CTO – Skaleet**

" Truly exceptional. David is an outstanding professional with remarkable human qualities. Working with him to grow a product and a company was a real pleasure. "
